👤 PROFILE

DevOps Engineer with 5 years of experience building and operating cloud-native platforms through automation and Infrastructure as Code. Proven success in designing and implementing CI/CD pipelines to streamline deployments and improve reliability. Highly skilled in Docker, Kubernetes, AWS, and Git-based CI/CD (GitHub Actions, GitLab CI), with strong programming experience in Python and JavaScript. Focused on improving operational efficiency, scalability, and delivering business-aligned solutions.

📁 PROFESSIONAL EXPERIENCE

DevOps Engineer

Kotaicode GmbH

05/2021 – present

Frankfurt, Germany

- Built and maintained CI/CD pipelines using GitHub Actions and GitLab CI, **reducing deployment time by ~40%** and enabling automated testing and deployments across multiple environments.
- Designed and operated containerized platforms using Docker and Kubernetes (EKS) on AWS, **improving application availability and scalability** in production environments.
- Implemented observability and alerting with Prometheus, Grafana, and Loki, **reducing incident detection and response time** and improving system reliability.
- Managed and secured AWS infrastructure including EC2, EKS, ECR, S3, IAM, VPC, and Route53, **supporting business-critical production workloads**.
- Optimized cloud costs through AWS Cost Explorer analysis and dynamic node provisioning with Karpenter, **reducing AWS infrastructure costs by ~30%**.
- Implemented GitOps-based deployments using ArgoCD and standardized releases with Helm charts, **increasing deployment frequency and improving rollback reliability**.
- Automated infrastructure provisioning and lifecycle management using Terraform and Crossplane, **reducing manual configuration errors and improving environment consistency**.
- Collaborated on the development and operation of production applications, supporting backend services (Python, Node.js, Golang), frontend builds (React.js), and relational databases (PostgreSQL, SQLite) in **CI/CD-driven, containerized environments**.

🧠 SKILLS

Cloud Platforms

AWS (IAM, EC2, ECR, EKS, VPC, S3, RDS, Route53)

Monitoring

Prometheus, Grafana, Loki

Programming Languages

Python, JavaScript, Golang

Soft Skills

Problem-solving, Teamwork

DevOps Tools

Kubernetes, Docker, GitLab CI, GitHub Actions, Jenkins, ArgoCD, Helm, Ansible, Terraform, Crossplane

Backend Frameworks

NodeJS Express, Python Flask

Version Control

Git, GitHub, GitLab

PROJECTS

K8s Resource Booking Operator

04/2023 – present

Control and schedule cloud resources using custom Kubernetes operator

Built a Kubernetes operator using **Golang, Kubernetes CRDs, and the Kubernetes API** to schedule and manage tagged cloud instances via time-bound bookings, automating start/stop operations, preventing double-booking, and reducing idle cloud costs.

Cronochat

Slack Messaging Application

Our Slack application enhances team communication by allowing users to schedule, recurring, broadcast and send anonymous messages. It streamlines interactions and ensures efficient information flow, making it ideal for maintaining team cohesion and managerial efficiency.

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA) 
- Certified Kubernetes Application Developer (CKAD) 
- AWS Certified Cloud Practitioner 

LANGUAGES

- English
- Malayalam

EDUCATION

Bachelor of Technology

Govt. Engineering College Palakkad

08/2016 – 09/2020

Palakkad, India
